ABOUT ME

I have over 7 years of experience with FullStack development, working with front-end and back-end. React and NodeJS being my mainly language now and my focus is to improve my knowledge. I constantly keep myself up-to-date with the company technology that I am working on. For this I like reading and practicing new languages that appear in the market. My studies were focused in Java and C++ while doing my Bachelors in System Information.

A little bit about my personality, I'm very friendly, hardworking and I have great ability to solve problems.

EMPLOYMENT

Software Engineer, ClusterStack

JUN 2022 - Present

As Software Engineer I'm working to help the company build a system that have as mainly idea bring more information and opportunities to the person that want immigrate to another country.

Technologies:

Html, Css, JavaScript, ReactJS, NodeJS, RestAPIs, expressJS, GraphQL, MongoDB, Tailwind, Amazon S3, Kubernetes, Docker, Git, Clear Code.

Java Software Developer, Freedom System

AUG 2015 - DEC 2021

At Freedom System I was worked as Java Software developer, and as some tasks that I had to perform being start new projects, talk with their clients, get the requirements of the project and build projects with clean code and excellence using the languages of the company.

Sometimes handling with problems and having to find the best approach to solve them, giving to the client the best result and experience.

In different cases I had to learn new languages, methods and external API's to improve the project experience.

Technologies:

Html, Css, JavaScript, JQuery, Java, Hibernate, Spring, Spring Data, Rest APIs, Git, SQLServer, Mysql, Oracle, Clear Code, Scrum Method.

PROJECTS
